NEFF has been and always will be about bringing joy to the kitchen and sparking cooking enthusiasm in people.

We have sharpened, refocused and refined the NEFF brand whilst retaining the values that make NEFF so inspiring to those that love to cook.

Our logo and tagline have evolved - Cook. Create. Inspire. In this brochure we reinforce the unconventionality of the brand - how we truly are *Open Like No Other* and we unfold the range that we will introduce this year.

# Cook. create. inspire.

The new refreshed N90 & N70 are refined and sleek in the new Graphite Grey and have an intuitive new Touch Screen Control. Our N50 Range is also fully detailed with the more traditional dial controls available in classic Stainless Steel and Graphite Grey – truly offering something for every cooking style.

# **Open** for **CREATIVE FREEDOM**

### Slide & Hide<sup>®</sup> – The only oven with a disappearing door

Slide & Hide<sup>®</sup> is simply the first choice for individualists, who want to enjoy their passion for cooking without limitations.

Our iconic Slide & Hide<sup>®</sup> door effortlessly slides away beneath the oven when not in use. So nothing gets in the way of your creativity. Get up close and personal to season and stir your favourite dishes.

# **Open** for **YOUR TASTE**

### Circo Therm<sup>®</sup> – Hot air system for simultaneous cooking

Circo Therm<sup>®</sup> hot air technology focusses heat directly on the food being cooked, so surfaces of bakes and roasts are sealed quickly. This seals in moisture makes meats juicier and cakes delicious and moist.

Circo Therm<sup>®</sup> allows you to be the most creative cook you choose to be - show off bakes evenly cooked, inspiring powerful flavours that can all be cooked with more delicate dishes and each one tastes just as it should - and for those that want to use every inch of the oven when it's on, you can easily bake and roast meals for later in the week at the same time - being not only creative but energy efficient too.

# **Ultimate flavour** and texture

Cooking with steam isn't just cooking with steam, its temperature, volume and the precise moment it hits your food all play an important role in flavour and texture. The NEFF Core range has a variety of steam options to suit every cooking style across the various value classes.

### Intensive Steam

Intensify flavours and preserve nutrients

Experience Full Steam with the new Intensive Steam feature with 120°C heat that retains your ingredient's nutrients and taste, for deliciously moist and flavoursome results.

### Vario Steam®

#### Family feasts, cooked to perfection

Vario Steam<sup>®</sup> gives dishes just the right amount of moisture by adding steam at three intensity levels, meaning all your dishes retain their gorgeous colour and flavour. A low level is perfect if you're reheating a dish you've cooked earlier and a higher level is great for baking bread.

### Added Steam

#### Perfect for bread baking

Added Steam releases steam into the oven at the start of a bake, allowing for perfect moisture levels without compromising on a crispy crust. For perfect bread, muffins, and more.

# Fully connected cooking

Home Connect

Be inspired and reduce food waste with free recipes in the Home Connect app and with our recipe partners. Achieving perfect results has never been easier. With Oven Assistant, simply use the Home Connect app or ask Alexa to find the perfect setting for your dish. For regularly used programmes, save these as favourites for super quick, convenient access, so you can concentrate on your cooking. Stay better connected with your guests with oven control and monitoring via smartphone, voice or smartwatch. No more dashing back and forth to the kitchen!

# Introducing GRAPHITE GREY to the N90 & N70 Collections

#### Introducing Graphite Grey to our NEFF Core Range

This rich dark tone of grey will be introduced across the NEFF Core Range throughout 2023. It's already available in our N50 Collection and this brochure has been designed to introduce the brand new features that we are introducing to our N90 & N70 Collections.

### Pyrolytic Self-Cleaning – So you don't have to

With Pyrolytic Self-Cleaning hand cleaning the oven becomes a thing of the past. Turn on the function and let it transform all the spatterings and drippings into ash. When the oven has cooled, wipe off the rest and presto, your oven is spick and span again. Easy Clean comes in handy as a quick way to clean your oven interior in between pyro cycles. Just some water and a drop of liquid detergent, activate the Easy Clean programme and wipe off the softened food residue afterwards.

### NEW Twist Pad®

NEFF

On selected models there is a brand new Twist Pad®\*. Using the same control to point and twist to operate the hob, this also features a graphite grey trim to accessorize to the oven trim.

\*This new Twist Pad® is available on selected N90 Flex induction hobs.

# Fascia Display Types HIERARCHY

### New high resolution interface available across N90 and N70 collections

Our Update to N90 & N70 includes the brand new Full Touch Screen interface. The Full Touch Screen is both intuitive and responsive – control the function and temperature with a swipe and a tap to allow for ultimate flexibility while cooking. The Full Touch Screen is available in three sizes to match the collections.

Home Connect

All N90 and N70 products come with Home Connect enabling you to be more connected to your cooking.

### N90 Full Touch 3

Full Touch Screen display; 6.8" high resolution TFT colour graphics display.

### N90 Full Touch 2

### N70 Full Touch 1

Full Touch Screen display; 3.7" high resolution TFT colour graphics display.

# Get more with HOME CONNECT

### More time for your creativity and your guests.

Connections are important for NEFF and the connections that we make over food are our favourite ones. When we share a meal with family and friends, we share a connection around the table but sometimes we all need a little help. When you're in need of a little creative inspiration, having a partner in the kitchen can make those connections easier and stress free...

## Home Connect

#### **Perfect Partners**

With food its not always about the refined presntation – it's about the flavour, the joy and the pleasure those shared meals bring. Stay better connected with your guests with oven control and monitoring via smartphone, voice or smartwatch. No more dashing back and forth to the kitchen – enjoy the benefits of our technology partnerships for perfect cooking results every time!

Want to find a new way to cook something or have a lot of seasonal ingredients? Spend some time with our recipe partners on Home Connect and be inspired by others!

kitchen stories

#### **Sharing Favourites**

We all have our favourite recipes, the ones that connect us, make us feel nostalgic and the ones that keep us at the table until the last morsel has been enjoyed. Let your oven in on the secret – share oven settings for your favourite recipe for quick, convenient access and it'll be ready to go whenever you feel inspired!

## Got your hands full creating your next dish?

Achieving perfect results has never been easier with Oven Assistant – simply use the Home Connect app or ask Alexa to find the perfect setting for your dish.

## **Key Functions Guide**

### **Cooking Functions**

#### **CIRCOTHERM®**

alternatively come on.

The CircoTherm<sup>®</sup> Power Boost function speeds things up even more when cooking for short periods of time - just put the food in and start the oven.

**CIRCO ROASTING** An ideal function for cooking meat and poultry for a rotisserie result where the fan and top element

m

5

#### **TOP/BOTTOM HEAT**

Providing conventional cooking heat sources at the top and bottom of the oven. Heat travels to the centre of the oven by natural conduction. Ideal for baking pastries and scones.

#### **CENTRE SURFACE GRILL**

You can use just the centre section of the grill for smaller quantities.

#### LOW TEMPERATURE COOKING

A special setting for hob-sealed prime cuts of meat and poultry. Meat/poultry is placed in a preheated dish and transferred into the oven. The low temperature setting uses a fixed temperature to gently tenderise without overcooking, resulting in meat/poultry that is juicy and melts in the mouth.

#### **BREAD BAKING**

Bread baking temperature varies between 180°C and 220°C. Ideally suited to baking crusty bread with an open texture. Up to three levels of bread can be baked at the same time.

**KEEP WARM** An ideal setting for keeping food warm without drying it out before serving. Typically set between

### **Special Features**

66°C to 100°C.

#### HOME CONNECT

Control your oven directly from a Smart Device App or Voice Command.

#### **CIRCOTHERM® GENTLE** Gentle

Optimised for gentler cooking and baking on one level. It's perfect for frozen or convenience foods, bread, cakes and meats. Available on all electronically controlled ovens.

#### **CIRCOTHERM® INTENSIVE** 8

Uses a combination of CircoTherm® and bottom heat, ideal for foods that need a crispy underside like pizzas or speciality breads. It can also be used for one stage pastry such as lemon meringue pie, eliminating the need for blind baking.

#### BOTTOM HEAT

Providing heat from the bottom of the oven, this method is ideal for pizza bases and pastry cases to create a crispy underside or for bain marie and casseroles.

#### \*\*\*\* FULL SURFACE GRILL

The grill element is situated in the oven roof. It is thermostatically controlled and will cycle on and off to maintain the required temperature.

#### \* DEFROST

The CircoTherm® fan circulates air through the oven to speed up defrosting times while retaining food colour and moisture. Ideal for delicate foods as well as fish and poultry.

#### **DOUGH PROVING**

This function provides a warm, moist environment which gives perfect conditions for proving any yeasted dough.

#### PLATE WARMING

Hot air is circulated at up to 65°C to safely warm plates and service dishes in preparation for dinner.

#### MEAT PROBE

The Multi Point Meat Probe measures the joint's heat at three points and the Single Point Meat Probe measures in one point, ensuring the right core temperature is reached, so you can take the roast out when it's ready.

#### **BAKING AND ROASTING ASSISTANT**

Baking & Roasting Assistant helps you to Cook Meals with ease, by simply selecting pre-selected food items from the Bake & Roast Assist menu. Select your dish on the display you will find a suggested temperature & cooking time. For Baking, Roasting & Grilling the entire process gives perfect cooking results

### **Cooking Functions With Steam**

~~~

\*\*\*

LL

0

#### VARIO STEAM®

Vario Steam® gives dishes just the right amount of moisture by adding steam at three intensity levels, for baking, roasting or just heating up. Foods come out with more intense flavour and an appetising appearance.

### **FULL STEAM**

Make your favourite dishes healthier by locking in food's nutrients and flavour with our Full Steam function. It's easy to operate and also simple to refill the one litre water container - press a button to open the front panel, remove the container, fill it and you're ready to steam ahead.

### **Oven Cleaning Functions**

#### PYROLYTIC SELF-CLEANING

Pyrolytic cleaning is a self-cleaning system for ovens. The process superheats the oven to approximately 485°C, which burns off any deposits from baking, roasting and grilling. This creates a perfectly clean oven and a residue of fine dust that's easily removed with a damp cloth.

#### **OVEN CLEANING**

A special electronic setting designed to keep EcoClean<sup>®</sup> surfaces inside the oven as clean as possible. Used on a regular basis, it can keep the oven's interior lining remarkably clean with minimal maintenance required.

#### **BASE CLEAN**

Base Clean helps clean the bottom of the oven by softening dirt with warm water. After the programme has finished you just have to wipe the base with a damp cloth.

#### AUTOMATIC SAFETY SWITCH OFF

For electronic ovens only, this feature will automatically cut in if no changes to the settings on the appliance have been made in a long time, giving you complete peace of mind.

### 9

#### SOUS VIDE

By cooking at very low temperatures (55°C -60°C) Sous Vide seals in flavour and achieves beautiful uniform results. With the option to cook in selected single or compact steam ovens.

#### REHEAT

Reheat allows you to gently warm dishes again and thanks to the moisture in the oven, they will look and taste freshly prepared.

#### **EASYCLEAN®**

For a lightly soiled oven, put approximately 400ml of water and a drop of washing-up liquid in the base pan and then select the EasyClean® programme. It softens baked-on residue so you can just wipe it down, for fast and uncomplicated oven cleaning.

#### DESCALING

All NEFF steam appliances contain a descaling programme which can be set according to the hardness of the water.

#### **ECOCLEAN®**

EcoClean® is a microfine ceramic bead coating on the oven's interior back, top or sides, depending on the model. It has a very large surface area, making it extremely absorbent. It absorbs fat droplets and keeps the inside of the oven clean.

| Temperature range                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Automatic switch off after |

# Enjoy more flexibilty with NEFF N50

842 m

Being open means that we embrace innovation, creativity, and individuality in our products, as well as our customers. And our N50 Range is no exception.

# Designed to match your style

The N50 Range now offers more choice with selected models in Single, Compact and Double ovens available in Graphite Grey or Stainless Steel finish.

### **Graphite Grey**

# Innovation at its core

Packed with innovative features, from the iconic Slide & Hide\* door, to Circo Therm®, Pyrolytic Self-Cleaning and Added Steam, the N50 Range has everything you need to express your creativity.

### **Stainless Steel**

# Precise control at your fingerips

It's also important to us that we embrace tradition, so each N50 appliance features precise, tactile manual controls. Plus, new to some models in the range is remote touch-control via the Home Connect app. Allowing for the ultimate convenient cooking experience.

THE NEFF OVEN COLLECTIONS

HOBS

VENTILATION

REFRIGERATION

LAUNDRY

35

1 Measured according the EN50304, 65/2014. 2 For further information on inverter technology, please go to www.neffhome.com/uk. 3For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

### Core Range Compact Ovens

## **Your Guide To Hobs**

#### Rethink cooking in NEFF's infinite kitchen

A great meal is all about the ingredients and cooking process. And it's the same when it comes to choosing the right hob. If you want flexibility, an electric FlexInduction hob might be what you're after. Or pick one of our innovative gas or fast induction hobs. Can't decide which one? Then the Domino range might be the best hob for you, as it mixes all of the above. There's a NEFF hob for anyone to get creative with.

### **Venting Hobs**

The 2-in-1 Hob and Hood is here. With freedom from a conventional wall or island hood, our integrated cooktop ventilation allows you to reclaim your space in the kitchen. The NEFF Venting Hob is set to create the stylish and sociable kitchen you've always dreamt of.

Our Venting Hobs offer maximum flexibility in installation options - Unducted, Partly Ducted, Fully Ducted & Ducted out.

Featured model: T58TL6EN2 N90 80cm Venting Hob

### **Flex Induction Hobs**

For sociable cooks who often find themselves juggling multiple pans, a FlexInduction hob provides any size pan, anywhere cooking within the zones. When the zones are activated, pans will receive instant, even and rapid heat transference wherever they are placed. Our range of Flex Induction hobs are available with a number of controls either with a TFT touch screen or using a NEFF Twist Pad<sup>®</sup>.

Featured model: T69FUV4L0 N90 90cm Flex induction hob with new Twist Pad®

### **Induction Hobs**

If sleek, stylish and clean lines are more in keeping with your kitchen design, our Induction hobs provide a minimalistic and premium look whilst providing a quick and responsive cooking surface. Cooking with an Induction Hob saves energy and is incredibly safe – there is little residual heat once the saucepan is removed from the hob.

Featured model: T46PD53X2 N70 60cm Induction Hob

### **Domino Hobs**

Our domino hobs can be mixed and matched to create a cooking station that's all your own. With gas (30cm), Quick-Light ceramic (30cm), FlexInduction (30cm) and Teppan Yaki (40cm) hobs within the range, our Domino hobs can be linked to provide the ultimate versatile cooking experience.

Featured model: T63TDX1L0 N70 30cm Flex Induction Domino Hob N23TS29N0 N90 30cm Gas Domino Hob

### HOBS

DISHWASHING

### **Ceramic Hobs**

With their frameless design, our Ceramic hobs stand out in any kitchen, and a whole range of options with up to 17 power settings makes preparing the next feast as easy as pie. Better still, our enhanced touch control panel provides full flexibility over your cooking.

Featured model: T16NBE1L N50 60cm Ceramic Hob

### **Gas Hobs**

For traditionalists who prefer to see exactly how much heat is delivered to their pans, gas cooking provides a robust and reliable way to prepare your favourite dishes. You can control your hob by numbers and not by eye with our precise and responsive FlameSelect<sup>®</sup> heat control feature, available across selected gas hobs.

Featured model: T27CS59S0 N70 75cm Gas Hob

## **Your Guide To Sizes & Finishes**

#### A hob to suit every chef

We strive to maintain a range of hobs with sizes and finishes to suit all requirements. Choose from a number of options including colour trimmed models to match other NEFF appliances, or variations that blend in naturally with the worktop.

### **NEW** Induction Cookware Accessories Range

## Excellent accessories that perform as well as your hob does.

This new range of Induction Cookware Accessories are designed to perfectly fit Flex Induction and Induction hobs. The rectangular shapes **perfectly fit into the flex zones**.

All accessories are **oven-proof up to 220°C** with a **non-stick coating** that cooks your food perfectly while also being **easy to clean**.

The pans are designed to be **easily stacked** to maximise your storage space.

#### Double Flex Pans Set (4 Pans)

Includes:

- Flex Pan Large
- Flex Pan Medium
- 2x Flex Pan small with lid.

TOUCH CONTROL

Simply select a zone then swipe your finger across the control panel to select a heat mode.

#### TWISTPAD® FIRE

With the removable and illuminated TwistPad<sup>®</sup>Fire dial you can react to pans bubbling away quickly and easily. Simply point and twist towards your cooking zones to activate and adjust heat.

### TWIST PAD®

The Twist Pad allows you to precisely adjust the heating degree of pots, frying pans and grills with just one finger touch.

#### COMBIZONE

Individual yet flexible cooking areas can be used independently or linked together to create an expanded cooking zone that is optimised for flex induction.

(Qh

(Gh

#### COMBI INDUCTION

2 individual induction cooking zones can be combined to 1 large zone with even heat distribution.

### **Gas Features**

FameSelect<sup>®</sup> FLA Cook

#### **FLAMESELECT®**

Cook everything just right with 9-level FlameSelect<sup>®</sup>. With FlameSelect<sup>®</sup> the gas flame adapts to your cooking, offering precise control every time. For the first time ever, cooking with gas is as easy as cooking on an electric hob.

#### POWER LEVEL DISPLAY

Some gas hobs benefit from a host of features that are usually found on ceramic hobs, including an LED display. The residual heat indicator displays if there is any residual heat on the hob. In the event of a problem with the individual burner the indicator lights also act as warning lights.

#### HIGH SPEED BURNERS

Provide a surge of extra power; particularly useful for boiling a large pan of water quickly.

#### WOK BURNER

The secret of Chinese stir fry cooking is heat and speed. Our Domino wok (N23TS19N0) delivers 6.0kW.

HOBS

VENTILATION

#### **FRYING SENSOR**

The sensor automatically adjusts the heat to the pan to maintain an even temperature. This control allows you to cook all dishes to perfection as it maintains a consistent heat preventing overcooking or burning.

#### POWER MOVE

The combi zone offers two heating zones: boiling in front and warming in the rear.

#### INDUCTION

The heat is generated directly in the cookware for precise cooking that stops when power is off.

#### HOME CONNECT

Control your oven directly from a Smart Device App or Voice Command.

#### POWERBOOST

Optimised power level function for more flexible and even faster heating.

#### FLAME CONTROL

The flame failure safety device shuts down the supply of gas to the hob if the flame goes out for any reason. The automatic reignition uses a heat sensor to detect if the flame goes out and, if so, will automatically attempt to reignite.

#### CAST IRON PAN SUPPORTS

Firmly hold the pan above the flame, leaving space between the base and the burner. They're used on the majority of our models because of their robust and sturdy nature and tolerance to prolonged contact with heat.

#### EASY GRIP CONTROLS

Ergonomically designed to be gripped and turned easily, even with wet or greasy hands.

#### SIMMER SETTING

Excellent for slow simmering, almost all of our gas hobs have a very low burner with a maximum of just 1.0kWh.

## **Flex Induction Accessories**

#### **Flex Induction Accessories**

Spanning the length of your FlexInduction zone, our accessories are designed to inspire you in the kitchen. From everyday cooking to theatrical displays, there's an accessory to bring out the best in your favourite dishes.

## Saucepans

#### Saucepans

Ferrous metal saucepans are required for use on an induction hob. To check if a saucepan can be used with an induction hob use our quick magnetic test shown below. NEFF saucepans have been tried and tested to ensure that they offer optimum performance with NEFF hobs.

|                                  |                                            |                                                                                                                                                                                                                                                                                                            | A BUSER Dave       |         | A CALLER AND                              |                                    |                                                    |                    |          |

### **Venting Hob Installation Options**

For the full range of installation accessories see page 80 of the Appliance Line Drawings

| UNDUCTED      | PARTLY DUCTED |  |
|---------------|---------------|--|
| RECIRCULATION | RECIRCULATION |  |

#### Why use Unducted Recirculation

- Easy and quick to fit
- Less parts
- Cost effective

Requires no reduction in depth to the bottom two drawers and allows for more design flexibility, for example, floating islands.

Automatic run on of the extractor fan at min power level dries the filters and continues air flow through the service void, removing any potential moisture for extra safety.

### Why use Partly Ducted Recirculation

Required when the distance from the back of the appliance to back of the base unit void is greater than 80mm.

Suitable for installations with non insulated walls or where damp has been an issue.

#### FULLY DUCTED RECIRCULATION

#### Why use Fully Ducted Recirculation

Required when the distance from the back of the appliance to back of the base unit void is greater than 80mm.

Gives total peace of mind for non insulated walls or where damp has been an issue.

#### Installation considerations

#### What do I need?

- 4 x cleanAir filters and telescopic slider.
- These are supplied as standard with all inductionAir Plus appliances.

#### Good to know

- Telescopic slider ventilates air from the appliance into the service void. Max expansion of slider 80mm.
- Min requirement of service void 25mm, recommended 50mm min.

#### Important to note

- This option is NOT suitable for installations with non insulated walls.
- This is the ONLY installation type that uses the telescopic slider.

#### Installation considerations

#### What do I need?

Maximum drawer

70+cm worktop

- 4 x cleanAir re-circulating filters. Supplied with appliance.
- Starter Kit 1 **Z861KR0** or 2 **Z861KR1** depending on the work surface depth.

#### Good to know

- Partly Ducted Recirculation takes the air down into the plinth and ventilates in through the plinth cavity.
- This requires greater depth work surface or reduced depth drawers.
- The 94mm ducting height cannot be changed to a slimmer version (reduces effectiveness) using an adaptor, as the 94mm space is still needed for the 90 degree turn from the horizontal to the vertical.

#### Important to note

- Starter Kits 1 and 2 provide all the required ducting and connectors for this mode of installation.
- The appliance may be fitted with another manufacturers ducting that has a rounded radius (please check compatibility before purchase). You will still need to purchase a (Z821PD1) diffusor.

Maximum Drawer Depth 513mm with 70+cm worktop

#### Installation considerations

#### What do I need?

- 4 x cleanAir re-circulating filters. Supplied with appliance.
- Starter Kit 1 Z861KR0 or 2 Z861KR1 depending on the work surface depth
- To fully duct to the plinth an additional straight channel and a connector are required. A 500mm ducting section should be sufficient in most cases depending on worktop depth.

#### Good to know

- Full Recirculation kit takes air down through the plinth and out into the room via a plinth vent.
- This requires greater depth or reduced depth drawers.
- The 94mm ducting height cannot be changed to a slimmer version (reduces effectiveness) using an adaptor, as the 94mm space is still needed for the 90 degree turn from the horizontal to the vertical.

#### Important to note

• The appliance maybe fitted with another manufacturers ducting that has a rounded radius (please check compatibility before purchase). You will still need to purchase a (Z821PD1) diffusor.

DISHWASHING

### DUCTED OUT EXTRACTION

#### Why use Ducted Out

Allows the removal of heat and moisture created by cooking, as well as grease and odour.

An improvement of extraction rate over recirculation modes\* 615m<sup>3</sup>h recirculation 622m<sup>3</sup>h ducted out

\*As per test parameters for the energy label declaration.

Maximum Drawer Depth 513mm with 70+ worktop

#### Installation considerations

#### What do I need?

- Starter Kit 3 **Z861KE1** (Includes 4 acoustic filters, radius bend, connector and 50cm straight channel).
- To complete your installation we can provide additional ducting lengths, connectors and adaptors.

#### Good to know

- It is also possible to use a fully ducted system, out of the kitchen.
- The acoustic filter kit is still required and is accessed the same way as the recirculation options.
- The Venting hob has been tested with a ducting run of 8 metres with 3 x 90 degree turns and maintaining efficient performance.
- We don't currently offer an external grid to go on the outside wall - this needs to be sourced independently.

#### Important to note

• The appliance maybe fitted with another manufacturers ducting that has a rounded radius (please check compatibility before purchase) You will still need to purchase (Z811DU0) x4 acoustic filters.

# Your Guide to Island Solutions

#### Simply eye-catching

If you like a contemporary-styled kitchen with an island cooking area, our island cooker hoods can add an inspiring focal point. A kitchen island, being in the centre of the kitchen, provides a hub for cooking, entertaining and socialising in one of the most used rooms in the home.

### **Ceiling Hood And Hob**

- Can be installed to a minimum height of 1500mm.
- Some models available as plug & play & reversible motors.

### Worktop Installation

- Guided Air.
- Options for ducting.
- Featuring Hob Hood Control & Home Connect.
- Whisper quiet and powerful.
- Ambient Light.

### **Venting Hob**

- Designed with flexibility in mind.
- Many options and sizes to install.
- Incredibly quiet and unobtrusive on an island.

### **Island Chimney Hood**

- Sleek, stylish and convenient to use.
- No worktop or unit space is used.
- Reduced noise for better cooking environment.

### **Island Hood Sizes**

### **Island Hood Ranges**

# Your Guide to Wall Mounted Solutions

#### For a fantastic atmosphere

Hoods installed on the wall can be used to create a design feature in themselves, adding a focal point to your kitchen while offering powerful extraction for all types of cooking. Choose from a range of styles to suit your kitchen design, including the trendy Creative Slim hoods or Angled Glass hoods with features such as Ambient Light that let you express yourself with colour, as well as your cooking. And if choosing to install in recirculation, the hood can be fitted without a chimney piece for a sleeker finish to your hood installation.

### **Angled Glass**

- Inclined front with dimmable LED mood lighting.
- Fully automatic air sensor.
- Whisper quiet ventilation.
- Chimless or Chimney options.

### Flat Slimline

- Creative Slim.
- Unique to NEFF.
- Magnetic Surface Ideal for creative notes.
- Flat against the wall for more space.
- Quiet operation.

**Pyramid**

# Your Guide to Integrated Furniture Solutions

#### A great fit

When cooking up a meal for friends and family the last thing you want is the noise of a hood in the background. Our integrated furniture hoods are built to operate on low noise levels while maintaining high air quality in your kitchen. Choose between telescopic and integrated hoods to find the hood that fits your kitchen, and cooking style, best.

### Integrated Design Hood – Invisible design for that seamless finish

- Designed to fit neatly under an overhead unit.
- Integrated Hoods are discreet and save valuable kitchen space.
- Extra Storage Space The hood's T-shaped design creates extra space for many large and handy items up to 10kg on each side.
- Reduced Noise: the low-noise motor makes it possible to listen to your own kitchen story.
- Your kitchen deserves the best in lighting design. Our hoods with LED Lighting not only look good, they help you focus, whatever you're cooking.

### **Telescopic Hood**

• For a smaller kitchen where space is at a premium, these clever hoods pull out from underneath a cabinet when required.

### **Integrated Hood**

- These hoods look like they're part of the furniture.
- Hidden behind a unit door, they simply pull out when needed.

### **Hood Sizes**

90cm

70cm

### **Hood Ranges**

## **Your Guide to Control Types**

### **Home Connect**

Compatible with Amazon Alexa and Google Assistant.

### **Push Button**

Our classic hoods feature simple, sleek and easy to use push button controls. Available across selected models in the N30 Collection.

### **Touch Control**

Featured on selected models in the N90, N70 and N50 Collections. Touch Control flawlessly complements our ovens and compact appliances. An LED display is also available with selected Touch Control models.

**Remote Control** Available across all Ceiling Hood

models.

### **Rocker or Slider Switch Control**

Available on our N30 Telescopic and Canopy models, our rocker or slider switch control offers a simple and straight forward setting navigation that's neatly concealed within the hood furniture.

### Soft Touch Control

Available across selected models within the N70 and N50 Collection, our Soft Touch Control hoods allow for greater control over power levels. Selected models also feature a white LCD screen.

### **Rotary Switch** Control

Featured on selected Canopy Hood models within our N70 Collection, our Rotary Switch Control features a pop-out dial with 3 levels of power to choose from. When not in use the dial can be neatly popped back into place.

# **Key Functions Guide**

### **Features**

#### HOME CONNECT

Control all functions and settings of your hood directly from your smart phone and voice control for the ultimate connected cooking experience.

#### HOB HOOD CONTROL

Being able to control the hood directly from the hob means the hood turns on when you start cooking and, in automatic mode, can automatically regulate the power level for the best performance with the lowest noise - it also means you no longer need to worry about adjusting the hood and you can focus on your cooking.

23

#### CLIMATE CONTROL

Detects the amount of steam and smells using a sensor attached to the motor and automatically sets the most effective power level to extract it.

#### AMBIENT LIGHT

Illuminates your kitchen in the light that suits the occasion best. Choose from 31 colours to change how your kitchen looks and, most importantly, how it makes you feel.

### **Functions**

#### AUTOMATIC AFTER-RUNNING

Continues running at a low speed for 3-30 minutes before turning itself off. Perfect for keeping fresh air in the kitchen post cooking.

#### INTENSIVE SETTING

Boosts the extraction rate to the maximum level to cope with particularly demanding cooking conditions.

#### ELECTRONIC POWER LEVEL DISPLAY

The sleek display clearly shows the selected fan power level setting.

HORS

DISHWASHING

#### **EFFICIENT DRIVE MOTOR**

Save energy and enjoy a noise free, illuminated kitchen environment thanks to our ultra-efficient high-speed extractor hood fan, with Efficient Drive motor technology and LED lights.

#### **NEFF SILENCE BUTTON**

The unique noise reduction function reduces the fan noise by a couple of decibels, ensuring that the kitchen stays quiet while you cook and entertain your quests. This function can be used at any fan setting except fan setting 1.

#### SATURATION INDICATORS

Take the stress out of guessing, this function will prompt you if the grease filters should be cleaned. If the hood is installed in recirculation, this will also indicate when the charcoal filters need replacing.

#### **BOOST POSITION**

For our sleek angled glass and flat hoods, receive an extra boost of extraction performance in special cooking situations, for example when frying meat or fish. The front panel can be slightly opened during cooking to a defined extraction boost position in order to increase the steam catching rate of the hood and keep your kitchen free from steam.

#### NEFF FRESH AIR

Runs an automatic air exchange programme, turning the hood onto power level one for five minutes every hour for as long as required.

#### AUTOMATIC REVERT

Automatically reverts the hood back to a lower power level after approximately ten minutes of being on the intensive setting.

#### SOFT LIGHT

Brightens or dims the lights as it's switched on or off; just press and hold to adjust the level of brightness.

# **Your Guide to Installation Options**

The best way to remove steam and odours is to extract the air out of the room through ducting. Unfortunately, in apartments or where the hood is too far away from an outside wall, this may not be possible. In this case, the only alternative is to recirculate the air. Stale air is sucked through a grease filter, before being purified in a charcoal filter, and then pumped back into the kitchen via an opening in the hood.

#### Recirculation

#### Recirculating

Removes between 70-95% of odours depending on filter used. Requires changing of charcoal filter on a regular basis or a longer-lasting Regenerative filter for certain models can be used.

### Use the following equation to calculate your extraction rate:

Volume of kitchen (length x width x height) eg.  $4m \times 3m \times 2.5m = 30m^3$ 

6 x volume in normal operation and 12 x volume in intensive operation.

Please note that these are recommended estimates only to be used as a guide. This assumes a 2.5m standard ceiling height with 12 air changes per hour to match to an intensive extraction rate.

Extraction

#### Ducted

Removes up to 98% of odours in an optimal installation. Requires planning of ducting (ducting to be sourced separately), however doesn't require a recirculation charcoal filter.

#### **Regenerative Recirculation Filters**

The new Regenerative Charcoal Filters give you a long lasting filter, thanks to a regenerative process using your oven, and can even be installed without a chimney piece if preferred. Benefit from up to 95% odour reduction when in recirculation mode.

### Identify your extraction rate

Your extractor needs to circulate the air in the room 6 times in normal operation, 12 times in intensive operation, per hour. Use the below to help identify the required extraction rate which can then be used to select the appropriate extractor.

| 2.5m             | 3m               | 3.5m                              | 6                                                  |                                                                     |                                                                                      |

### **Recirculation Filters**

We offer a range of recirculation filters that are available depending on the model of hood you choose. Featuring powerful odour reduction rates and performance benefits, our new regenerative filters can last up to 10 years and are regenerated through a heating process in the oven every 4 months.

CleanAir Plus and Regenerative filters not available for all styles of hood. Additional module may be required to house the filter. Images for example only, different filters may come in a different size and style.

#### Installation

The following points should be observed for optimum ducted extraction results and low noise:

- 1. Ensure any pipe elbow bends are at least 30cm from the hood ducting opening.
- 2. Avoid reducing the diameter or area of the ducting.
- 3. Use wide-angled pipe elbows, but keep the number used to a minimum.
- 4. Only install pipes with smooth, even inner surfaces. If a flexible hose has to be used, ensure it is pulled tight to smooth out the ridges before fixing.

#### **Easy Mounting System**

Thanks to an easy wall-mounting system, selected hoods can be installed quickly and securely by one person. Rotating offset 'cam' fixings make it possible for positional adjustments of up to 6mm, helping to get the hood level and stable. (Not available on all our hoods.) HOBS

Cleanair Plus Filter

Up to 95%

Approx. once per year

Up to 3dB (A) sound reduction Better extraction performance Anti-fish treatment Removes over 99% of all pollen

Extra module attached to hood chimney (stainless steel) New Chimney Hoods: Integrated plastic module fitted inside the chimney piece

Yes (Angled and Flat only)

Long Life Regenerative Filter

Approx. once every 10 years

- Up to 3dB (A) sound reduction
- Regenerated in the oven every 4 months recommended (2 hours 200°C)
- Better extraction performance

Extra module (as per CleanAir filter) onto chimney or inside chimney. 'Chimless' installation possible (Angled and Flat only)

Yes (Angled and Flat only)

- 5. Use ducting pipes with a diameter of at least 120mm, but ideally 150mm.
- 6. Keep piping to a minimum use the most direct route to an external outlet.
- 7. Make sure that there is an adequate supply of fresh air to replace the air ducting out of the kitchen, i.e. windows that can be opened, doors to adjacent rooms, air bricks. Problems with installation may occur if points 1-7 are not observed.

### **Seamless Hob Installation**

Celebrate your kitchen design with visual unity. Our Glass Draft Hood has been designed to be installed seamlessly with any of our Flex Design hobs in the corresponding 90cm or 80cm width.

To create the seamless installation, the Glass Draft Hoods can be combined with a select range of induction hobs using a seamless installation kit to be installed seamlessly in one aperture cut out.

<sup>1</sup>Power automatically reverts back to normal setting after intensive. <sup>2</sup>A type of recirculating kit is required if recirculating. <sup>3</sup>Air Flow and noise declarations made in line with CECED Code of Conduct. <sup>4</sup>Measured according to EN61591 on largest pipe diameter. <sup>9</sup>Sound power measured according to EN60704-3 on largest pipe diameter. <sup>9</sup>From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

<sup>1</sup>Power automatically reverts back to normal setting after intensive. <sup>2</sup>A type of recirculating kit is required if recirculating. <sup>3</sup>Air Flow and noise declarations made in line with CECED Code of Conduct. <sup>4</sup>Measured according to EN61591 on largest pipe diameter. <sup>5</sup>Sound power measured according to EN60704-3 on largest pipe diameter. <sup>6</sup>From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

550/650 ٠ D

<sup>1</sup>Power automatically reverts back to normal setting after intensive. <sup>3</sup>A type of recirculating kit is required if recirculating. <sup>3</sup>Air Flow and noise declarations made in line with CECED Code of Conduct. <sup>4</sup>Measured according to EN61591 on largest pipe diameter. <sup>5</sup>Sound power measured according to EN60704-3 on largest pipe diameter. <sup>4</sup>From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

<sup>1</sup>Power automatically reverts back to normal setting after intensive. <sup>2</sup>A type of recirculating kit is required if recirculating. <sup>3</sup>Air Flow and noise declarations made in line with CECED Code of Conduct. <sup>4</sup>Measured according to EN61591 on largest pipe diameter. <sup>5</sup>Sound power measured according to EN60704-3 on largest pipe diameter. <sup>6</sup>From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

<sup>1</sup>Power automatically reverts back to normal setting after intensive. <sup>2</sup>A type of recirculating kit is required if recirculating. <sup>3</sup>Air Flow and noise declarations made in line with CECED Code of Conduct. <sup>4</sup>Measured according to EN61591 on largest pipe diameter. <sup>6</sup>Sound power measured according to EN60704-3 on largest pipe diameter. <sup>6</sup>From top of pan supports. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

# **Your Guide To Refrigeration**

#### A style for all food lovers

Fresh, seasonal ingredients are a staple in any NEFF kitchen. That's why the right food storage is so important: all our models - whether it's a large American-style fridge freezer that can cope with the demands of a hungry family, or a side-by-side fridge freezer that integrates seamlessly into the kitchen furniture – NEFF give you the flexibility to keep your fruit, vegetables and herbs crisp and vibrant for longer.

### **Built-In Fridge/Freezer**

Designed to fit in a single housing unit, our range of fridge freezers include models from the tall larder style to more compact styles. All of our fridge freezers have a 4 star rating.

KI8865DE0 Built-in fridge freezer N 90

### American-Style **Fridge Freezer**

It's big, bold, and there's enough space for even the largest family's chilled and frozen food. You'll also find an ice and water dispenser to keep you cool all year round.

# The new XL & XXL built-in fridge freezers

With the new NEFF Integrated XL and XXL fridge freezers, you can enjoy a large cooling space that's as flexible as life. Discover the flexible possibilities for large capacity food storage, from storing multiple cakes to giant watermelons. At the same time the XL and XXL built-in fridges integrate seamlessly into your kitchen, making the big inside no big deal from the outside. The combinations of fridge, freezer and door compartments allow large families or passionate cooks to effortlessly store food for large parties without having to constantly rearrange everything. This saves you more time for your creative culinary ideas.

### Increase your flexibility and space in cooling

Having extra room can really open you up a world of possibilities. With the latest 289 litre XL and 381 litre XXL fridge freezer combinations, you'll have ample space to accommodate your biggest culinary dreams. Imagine being able to effortlessly store entire trays of baked goods or sizable watermelons without having to rearrange everything else in the fridge. That large additional space is like a secret ingredient that can take your cooking to the next level and invite even more deliciousness into your life.

### Door Alarm

Say goodbye to the frustration of accidentally leaving the fridge door open. Equipped with both visual and acoustic alarms, the fridge signals that it needs another gentle shove for sustainable cooling. Even if the door is slightly ajar, the fridge will request a gentle nudge to maintain optimal temperatures. And for added convenience, if your fridge is integrated with the Home Connect app, you'll receive notifications directly to your smartphone.

### Fresh Safe 1 <0°C>

Enjoy a variety of storage options to suit your preferences, including a flexible drawer for fruits and veggies. In addition, the unit features a dedicated compartment for meat and fish that's kept at an optimal temperature up to 0°C.

### **Home Connect**

Simply use your phone or tablet to control your XXL fridge, even when you're on the go. Use your Home Connect app to get smart benefits from your fridge. Control your fridge on the go and easily set it to ECO or Holiday Mode, even after you've left home. Simply smart.

### Individual Temperature Control

Tastes vary - and so do the ingredients. Individual Temperature Control enables you to set a higher temperature when no fresh greens, reds or yellows are sitting on their chilled shelves. Simply choose an eco-friendly mode with a higher temperature for your fridge via the electronic control panel, while the Individual Temperature Control keeps the freezer up and running.

### **Freezer Light**

Just find what you are looking for: Our Freezer LED light illuminates every frozen ingredient in your drawers. And if your appliance is Home Connect enabled, you may additionally adapt the light intensity to your liking. Also, you may activate the emotional light which adds a lovely light effect to your kitchen even when the doors of your fridge and freezer are closed.

# **Your Guide To Sizes**

### Combination and layout solutions for installing your cooling appliances

With so many kitchen styles to choose from, at NEFF we've catered for all spaces and lifestyles. With the option to build a cooling solution to your requirements, our installation options are designed to offer the ultimate flexibility. From side-by-side fridge and freezer installations to over-under stacked installations, it's easy to incorporate NEFF appliances into your overall kitchen design.

## **Over-Under Installation:**

Our over-under installation options are perfectly tailored to suit every cookaholic's lifestyle. Conveniently 'stack' your fridge and freezer and ensure your cooling space reflects how you like to cook. For those who tend to shop little and often, a smaller capacity fridge & freezer doesn't need to impact on your space. Equally, if family life makes ample freezer space essential, an equal height '50/50' fridge freezer combination provides the perfect solution.

# Side-by-Side installation:

Our single door fridges and freezers are designed to sit parallel to one another in order to create a double door effect. By placing a left-hinged fridge and a right-hinged freezer (or vice versa) side by side you can easily browse fresh and frozen ingredients before getting creative in the kitchen. Smooth door opening is facilitated by a simple fixed or sliding hinge. Equally if you want to place a fridge in the kitchen and a freezer in the utility room, our appliances can be installed in a way which suits you.

# **Hinge Types**

### Hinges to suit all kitchen designs

Our doors can be right-hinged or left-hinged in order to suit your kitchen design.

## **Fixed Hinge & Soft Close Hinge**

The benefit of this type of hinge is that it carries more weight – ideal for kitchen cabinetry made from heavier hard wood. This hinge also allows the door to open at a wider angle, making the fridge cavity easily accessible. All NEFF doors close automatically when at an angle of approximately 15-20° and selected models have the benefit of Soft Close.

A fixed hinge offers you additional capacity in the refrigerator, leaving you more room for your food.

## **Sliding Hinge**

Our sliding hinge feature sits between the appliance and the furniture door and is secured by a series of brackets. As you open the furniture door, the appliance door is also opened via the sliding bracket design.

## **Design Features**

### SOFT CLOSE

With Soft Close, the fridge door closes automatically when open at an angle of 20° or less. With a soft closing mechanism, it's the ideal addition to kitchens with soft close cabinets.

EASY LIFT SHELF

With Easy Lift shelving, it's possible to adjust shelves with just one hand - even when they're fully loaded. Perfect when unloading shopping or introducing freshly prepared dishes to the fridge.

### **BOTTLE RACK** Always have a chilled bottle on standby for those impromptu get-togethers.

## **Cooling Functions**

### MULTIPLE COOLING SYSTEMS

Separate cooling circuits for independent temperature control, to prevent the transference of odours and/or humidity between the fridge and freezer cavities.

### NO FROST

No Frost freezers automatically react to any signs of frost so it never has a chance to build up. With a No Frost freezer air is blown from the back wall and circulates over food items. As a result, there is no condensation or build up of frost and food does not freeze together.

### SUPER FREEZE

Lowers the temperature for rapid freezing when adding fresh food.

### INTELLIGENT COOLING

Uses a range of innovative sensors to calculate the quantity of food in the fridge with the outside temperature. The fridge then adjusts the internal cooling power accordingly.

### DOOR OPEN

Door Open and high temperature alarm systems alert you if the door has been left open or a power cut has occurred. Ideal for mitigating food wastage.

### MULTI AIR FLOW COOLING

Greatly improves the circulation of air around the fridge, regulating the temperature and humidity levels and eradicating condensation build up, so that your food stays fresher for longer.

### LOW FROST

Low Frost improves performance and reduces frost build up in an energy efficient way. It also provides more storage space due to there being no internal evaporator and you may only need to defrost your freezer every 2-3 years.

### ECO AIR FLOW

Our Eco Air Flow system treats your ingredients as lovingly as you picked them. Eco Air Flow circulates the air evenly in your fridge to keep flavours delicious under ideal cooling conditions.

### SUPER COOL

Allows for the increase in temperature that occurs when fresh food is added. As soon as the food is cold, the fridge will readjust to the normal temperature.

### FRESH SAFE

Our Innovative 0°C Fresh safe preservation system extends the life of food times to reduce waste.

# stacked on their side.

### EASY ACCESS SHELF The retractable glass shelf allows for

easy loading and unloading as well as better access to your food. Ideal for putting the finishing touches to those delicate desserts.

## Unique to NEFF, making your life even easier

### EASY CLEAN MAGNETIC **DOOR SEALS**

The magnetic door seals on all of our refrigeration ranges are removable, making them easy to clean and/or replace if necessary.

### ANTI-SPILL TRIMS

Effectively hold up to a pint of liquid in case of accidental spillage. Food is protected below and the clean-up process is a little less messy.

### EASY LIFT DOOR STORAGE Easily adjust door storage with just one hand. Combined with Easy Lift Shelves, your fridge space won't restrict your favourite foods and drink.

VARIO SHELF Designed to offer complete flexibility in your fridge, sectioned glass shelves can simply be separated and slid underneath when not in use. Ideal for larger dishes, with space left over for a convenient condiments storage area at the back.

# **Your Guide To Dishwashers**

### Clean dishes, whatever your wishes

Choosing the right appliance to complement your kitchen and lifestyle can be challenging. To help you select the perfect kitchen companion, we've introduced easy-to-follow Collections based on product features, technology, design and simplicity. There's a Collection to suit everyone.

## **Full Size Dishwashers**

Designed to be as flexible and accommodating as possible, our full-sized dishwashers have adjustable baskets and racks to hold large or awkward items, as well as a choice of wash cycles, from intensive to delicate.

## **Slimline Dishwashers**

Where space is an issue, our SlimLine model S875HKX20G is ideal. Just 45cm wide, it fits into the smallest of spaces, but still offers all the features of a full size model. It's surprisingly roomy and able to cope with nine place settings at a time.

Featured model: S875HKX20G N50 45cm Fully Integrated Dishwasher

# **Feature Highlights**

- All dishwasher models come with Home Connect
- Water consumption 60cm width 9.5L/45cm width 8.5L
- 10 year anti-rust warranty
- Noise level 42 -48dB

### The models from the collections can include:

# **Dishwasher Flexibility**

## **Flex Baskets**

Fitting casserole dishes, large pans, full dinner sets and tall-stem wine glasses into a dishwasher can be a challenge - especially when you're cleaning your most robust cookware alongside delicate items. Our Flex Baskets are designed to accommodate those bulkier items and provide an even, thorough clean. We have two options of basket flexibility to choose from.

Flex 1

Two foldable elements in the top and bottom rack provide the freedom to adapt the basket for different loadings.

### **Flex Cutlery Drawer**

Transform your third loading level into a versatile cutlery drawer. It handily clicks into place whenever you need a tailor-made space for your forks, knives, and small kitchen utensils.

Two foldable flip tines in the top basket and 4 foldable flip tines in the bottom basket offer quick and easy loading flexibility for safe positioning of glasses, cups, pots and pans.

### **Rack-Matic**

Allows the top basket to be raised and lowered as needed as well as run on an angle to cater for the wine glasses at the end of the night.

HOBS

# **Key Functions Guide**

## **Design Features**

### Aqua Stop

### AQUA STOP

Protects inlet and outlet hoses from leakage. A safety valve prevents any more water from entering the dishwasher and overflowing – even when the machine is off.

### OPEN DRY

No need to manually open the door of your dishwasher to allow the load to cool off. Open Dry takes care of that by opening the door automatically during the drying phase.

## INFO LIGHT

Info Light projects a red light onto the floor that showcases clearly that this dishwasher is in operation. Info Light is available for fully integrated dishwashers.

### Reat Exchanger

Assist

### HEAT EXCHANGER

Ensures that the drying phase of programmes is energy efficient and glassware is fully protected by preventing extreme temperatures.

### DOOR OPEN ASSIST

Door Open Assist is the perfect solution for anybody looking to achieve a sleek, handleless design in their kitchen. Simply press lightly on the front of the unit to open the dishwasher door. Ideal for a range of integrated designs, Door Open Assist is also a convenient addition to busy kitchens. Electronic child lock can be activated, creating a double push to open.

### ZEOLITH

A form of mineral, Zeolith has the ability to absorb moisture and turn it in to heat. The heat produced naturally by Zeolith is used during the drying cycle, ensuring that no additional energy is needed to dry your cookware. With the ability to absorb moisture, your glasses will come out steam free and will be cool enough to handle. Automatically activated by programmes with a drying phase, Zeolith regenerates itself and lasts a lifetime, so you don't have to maintain it.

## GAP ILLUMINATION

Gap Illumination shines a soft white light on the side of the dishwasher to indicate the dishwasher is running. If you pause the cycle or open the door, the light will start blinking. This feature is available across Vario Hinge models.

### TIME LIGHT

Time Light projects the remaining time as well as the ongoing process of the programme on any type of kitchen floor. Time Light is available for fully integrated dishwashers and washing machines.

### VARIO HINGE

1

Enotion Light"

> System E

Vario Hinge attaches your furniture front to the door of the fully integrated dishwasher, regardless of whether it's on the floor or in a high cabinet. Vario Hinge smoothly lifts the furniture front above the plinth and base.

### EMOTION LIGHT

LED lights in the front edge light up the dishwasher cavity.

### GLASS CARE SYSTEM

Your dishwasher has a thing for delicate glassware, so it fine-tunes the water hardness to protect your glassware with never-ending care. A combination of the Glass 40° programme and Extra Shine option will clean your items impeccably without worry. With the introduction of anti-slip surfaces, silicon inserts and supports within Flex 2 baskets your glassware has never been more protected.

## Programmes

### FAVOURITE

Choose a programme, option, or combination on your dishwasher and save it as "Favourite", either via your Home Connect app or directly on the dishwasher.

### 1 HOUR 65°

Programme

0

C,

No need to stack your dinner or party dishes for hours, simply load the dishwasher again. This function cleans and dries dishes in only 60 minutes. Spend more quality time with family and friends while enjoying food and tales using your favourite tableware.

### EASY CLEAN

Give your dishwasher a deep clean with the new Easy Clean programme. Simply run the high temperature setting together with some dishwasher cleaner in an empty machine to remove limescale and grease from inside the cavity.

## **Special Functions**

### **EXTRA SPEED**

Depending on the selected programme you can reduce the running time of your dishwasher's programme to up to 66%. Make more of your quality time and enjoy optimum cleaning and drying results - while Extra Speed takes care of the load up to three times faster.

PO Acti

### POWER ZONE

Activates higher wash temperatures and increases spray arm pressure in the bottom basket, while maintaining a more gentle wash in the top basket.

### 10-YEAR, ANTI-RUST WARRANTY

Due to advanced materials and manufacturing technologies, in addition to our standard appliance warranty, we're able to provide a free-of-charge warranty against the rusting-through of the dishwasher's inner cavity. HOBS

VENTILATION

REFRIGERATION

### SILENCE

'Silence on demand' whenever you wish for peace and calm select this option via the Home Connect app. On activation the cycle will pause for 30 minutes. You have the flexibility to restart the cycle at anytime if you wish, after 30 minutes the programme will resume.

### AUTOMATIC PROGRAMMES

Take the worry out of selecting exactly the right programme and let the machine do it for you. Automatically changes settings to ensure you get the best clean for your load.

### CHEF 70°C

With a hotter setting and a powerful spray, the Chef 70° programme is perfect for cleaning even the dirtiest pots, pans and cooking utensils. Items placed in the lower basket are subject to higher spray pressures, eliminating the need for soaking and effectively removing even the most stubborn stains.

### EXTRA SHINE

By increasing the amount of water during the rinse cycle and extending the drying phase, water marks are prevented and the drying result is further improved.

### EXTRA HYGIENE

Provides a hotter final rinse, with 70°C water for 10 minutes, to effectively cleanse items such as chopping boards and cooking utensils\*.

## Semi & Fully Integrated Dishwashers

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

<sup>1</sup> On an energy-efficiency class scale from A to G
 <sup>2</sup> Energy consumption in kWh/100 operating cycles (using Eco programme)
 <sup>3</sup> Water consumption in litres/operating cycle (using Eco programme)
 <sup>4</sup> Duration of Eco programme
 <sup>5</sup> We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmo/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

S875HKX20G **Home Connect** 

Yes, model has this feature
On an energy-efficiency class scale from A to G
Energy consumption in kWh/100 operating cycles (using Eco programme)
Water consumption in litres/operating cycle (using Eco programme)
Duration of Eco programme
We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmo/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to 3<sup>44</sup>'s crewed joint.
Data valid in this table as of April 2022. Subject to modification without prior notice.

All of our dishwashers have Aqua Stop water protection, detergent aware, Dosage Assist and a door lock as standard. All NEFF dishwashers are suitable for use with doors from 2.5kg-8.5kg apart from SlimLine S875HKX20G (2.5kg to 7.5kg) and VarioHinge models S195HCX26G and S295HCX26G (4.5kg to 11.0kg) if the correct door springs are installed.

# Your Guide to Laundry

## Quality, performance and efficiency are standard on all our laundry appliances

A good laundry appliance should be reliable enough to provide perfect results again and again. We have three types of model to cover all your laundry needs: washing machines, washer dryer combination models and tumble dryers. All feature our signature innovations, designed to improve efficiency and, most importantly, to make life easier.

Our washing machines are so quiet they won't drown out your conversation. We have also added the innovative Time Light feature so you can see when your washing will be finished even when the furniture door is closed. A perfect solution for open plan kitchens.

## TIME LIGHT

The time remaining of the wash cycle is clearly projected on to any floor surface. So you don't have to open the door to see when your washing will be finished. Perfect for open plan kitchens. Featured on model W544BX2GB.

# **Key Functions Guide**

## **Key Features**

### INTELLIGENT WATER SYSTEM

Efficient washing is made simple with our built-in load sensor. With up to 256 load levels distinguished and a flow sensor for detecting the kind of textile, the amount of water used is tailored to your wash.

### SENSOR DRYING

Continuously monitors the drying performance using sophisticated sensors to prevent overheating and over drying. The dryer stops automatically when the correct level of dryness is reached to deliver the finest fabric care and reduce ironing.

## **Additional Features**

### TIME DELAY

Allows you to programme the machine up to 24 hours in advance to suit any schedule or to take advantage of off-peak electricity rates.

### DRUM LIGHT

The new drum interior LED light is a big help when unloading your fully-integrated NEFF built-in washing machine. It lights up the inside brightly enough so you'll never overlook another item of laundry.

## Programmes

### STAIN-REMOVAL PROGRAMME

Banish even the most stubborn stains with our stainspecific programmes. With dedicated settings for red wine spillages, tomato splashes and butter/oil residue, there's no need to worry about cooking-related stains.

## Options

### LESS IRONING

Reduces the creasing of clothes as the water is gently removed from the wash with a light interval spin at the end of the cycle.

### **EXTRA RINSE OPTION**

Available on almost every programme, it's especially helpful for sensitive skin.

HOBS

VENTILATION

REFRIGERATION

DISHWASHING

### ANTI-VIBRATION SIDE PANELS

Our new side panels increase stability and reduce vibrations during even the fastest spin cycle. With a 3-step system which absorbs motor vibrations, centres unbalanced laundry and compensates for vibrations on the side walls, you benefit from low noise washing with every load.

### ECO BAR / ECO BAR PLUS

Know how much energy you are using with the new Eco Bar feature, available on selected freestanding appliances. The LED bar displays five possible consumption levels. With Eco Bar Plus, energy and water consumption is displayed, giving you an indication of resources used on your chosen programme and options. The fewer LEDs illuminated, the more energy you are saving.

### AQUA STOP / AQUA SECURE PLUS

Protects inlet hoses from leakage. A safety valve prevents any more water from entering the washing machine.

### **RELOAD FUNCTION**

If you need to add or remove an item after the programme has started, you can pause the cycle by pressing the Start/Reload button. The machine will check whether you can open the door and, if so, it lets you. To resume operation, just press the Start/Reload button again.

### DRUM CLEAN WITH REMINDER

Prevent odours and germs with our handy Drum Clean reminder. When the machine detects a consecutive number of low washing temperatures (<40°), you'll be prompted to start the Drum Clean programme.

### FLEXI TIME

Cuts programme times by up to 30%. Simply select the cycle you wish to run and then select Flexi Time.

## **NEFF Customer Service**

Here at NEFF, we understand that although our kitchens and appliances are designed to cope with even the most exacting cookaholics, sometimes you need to turn to us for help. Whether you need a visit from one of our engineers, some spare parts for your NEFF appliance or just some helpful advice, we're here to talk - around the clock\*.

### GIVE US A CALL ON 0344 892 8979

If you're in the Republic of Ireland, call us on (01) 450 2655

## VISIT OUR WEBSITE AT NEFF-HOME.COM/UK NEFF-HOME.COM/IE

We're available 7 days a week. Our specialist advisors are available Monday to Friday 8am to 6pm, Saturday 9am to 5pm and Sunday 9am to 4pm. Calls are charged at the basic rate, please check with your telephone service provider for exact charges. In some areas we may use an approved service partner and the process may vary for repairs carried out by our service partners.

Please note that due to the implications of COVID-19, our contact hours and service availability are subject to change. For the latest information and updates on our services please visit our COVID-19 Service Update page on: neff-home.com/uk/coronavirus. Republic of Ireland customers should visit: neff-home.com/ie/coronavirus.

\*Please note that after the working hours stated only a limited number of advisors are available.

### **RECEIVE THE HIGHEST STANDARDS OF SERVICE FROM NEFF**

NEFF appliances are well-known for their quality and we believe that our customers deserve customer service to match. We provide expert repairs both inside and outside the manufacturer's warranty period and we can offer advice on choosing an appliance which will enhance your favourite dishes.

NEFF is a division of BSH Home Appliances Limited, a company registered in England and Wales under company registration number 01844007, with registered office at: Grand Union House, Old Wolverton Road, Wolverton, Milton Keynes, Buckinghamshire, MK12 5PT.

## Register my appliance

### **REGISTER YOUR APPLIANCE AND WARRANTY**

It is important that you register all your kitchen appliances to ensure that the manufacturer has full details in the event of an important product update. You can find out more about registering your appliances online at:

### registermyappliance.org.uk

All NEFF appliances are supplied with a two-year manufacturer's warranty. Please call 0800 519 2115 (Republic of Ireland 01230 0344) to register your NEFF warranty and find out more about extending your cover.

Please be aware that the above telephone number is managed by Domestic & General Services Limited who administer the warranty registration process on our behalf.

### 

to repair NEFF appliances.

You can easily book and manage your engineer visit online at: neff-home.com/ uk/service/repair/book-a-repair-online or via our call centre (see contact details above). Republic of Ireland customers should call: 01450 2655.

Calls will be answered 24 hours a day, 7 days a week. Calls are charged at the basic rate, please check with your telephone service provider for exact charges.

## ACCESSORIES AND CLEANING PRODUCTS

You can find everything you need for any appliance on the NEFF online store. It's here where you'll find our tested and approved cleaning and care products, along with other accessories ranging from a Glass Holder for your new dishwasher to a Teppan Yaki for your hob, or a new set of Telescopic Rails.

Shop online at: neff-home.com/uk/store

Prefer to go online? You can visit our support content at: neff-home.com/uk/service/ support to quickly find the help you need. We cover questions about usage and maintenance of your appliance, as well as tips on getting started and installing your new appliances. You'll also be able to access your user manual at any time.

### GENUINE NEFF SPARE PARTS

NEFF keeps a comprehensive range of replacement spare parts for up to ten years. You can browse our exploded view diagrams on our store or speak to an advisor on the phone to help you locate and buy the spare parts you need.

### ARRANGE A VISIT FROM A NEFF ENGINEER

NEFF home appliances are built to the highest standard, but if you do need a visit from a NEFF engineer, we are here to help. Our locally based engineers are employed and trained by NEFF, which gives them unrivaled knowledge and expertise

In some areas we may use an approved service partner to carry out repairs on our NEFF appliances, where the repair process may vary.
